Subject ENHANCING THE RESILIENCE OF SMALL
HIGH-LATITUDE FISHING COMMUNITIES TO CLIMATIC
AND MARINE-ECOSYSTEM CHANGE

Dr. McGoodwin,

You may have heard that EPA is conducting a watershed assessment in Bristol Bay in response to requests to use our Clean Water Act Section 404(c) authority in relation to the proposed Pebble copper mine. The above title of a seminar you presented was forwarded to me by a colleague. Have you published a paper on this subject? If so, can you send me a reprint? If not, can you share your findings with our team?

We have assembled a team of aquatic ecologists, anthropologists, economists and geochemists to review existing information on Bristol Bay and the types of large scale development that are likely to occur there in the foreseeable future. By its title your paper appears to be useful. We would also be interested in any other publications or data you have relating to Bristol Bay.

Thanks,
Phil
